Botox

5 deaths

210 serious incidents

Botox is still represented and as harmless. However Botox is one of the strongest and most dangerous poisons at all.

Thus it does not surprise, as it became clear now, that **alone in Germany 5 deaths and 210 serious incidents arose by Botox.**

In addition one should note **that for each new manufacture load/batch of BOTOX innumerable animals must die painful.** This is due to the LD50-Test (LD50 = death for 50% of the tested animals) <http://www.ccohs.ca/oshanswers/chemicals/ld50.html>

The test- The poison is squirted groups by animals into the abdominal cavity. Each group receives another dilution of Botox. Thus the quantity is determined, with which exactly **half of the animals dies.**

This kind of **death is directly connected with terrible agonies.** It comes to **muscle paralyses, visual disturbances and difficulty in breathing.** The **death struggle** of the animals can **take three or four days,** until they **finally suffocate.**

Mahatma Gandhi said „The animal experiment is the blackest of all black crimes those humans makes themselves guilty for. “

- **Please inform you customers about those new findings of BOTOX and its damage to people.**
- **Please, in the same time underline the crime done in regards to innocent animals.**
